### DETAILED ACTION

#### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on November 6, 2003 has been entered.

#### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 13-16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Repo et al., Journal of Organometallic Chemistry, Vol. 541, pp. 363-366 (1997), previously cited (see Paper No. 5). The article discloses the reaction of 2,6-di-*tert*-butyl phenol or 2,6-di-isopropyl phenol with n-butyl lithium to form the lithium salt. This compound is then reacted with  $\text{Cp}_2\text{ZrCl}_2$  in THF. The product was then extracted with n-hexane and the use evaporation to obtain the final product. See Experimental Section on page 363. Note that the Repo et al. reference reads on the instant claims when n and n' are both zero.

*Allowable Subject Matter*

4. Claim 17 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 8-12 are allowed.
